KEY STAFF

James F. McClung, Jr.

Principal

BA, Social Services

Over thirty-five years of field and management experience with twenty-three years in the environmental field. Mr. McClung has organized and administered the planning, design, and remediation of more than \$200 million in remediation of hazardous materials projects. He is an accomplished public speaker, expert witness on environmental issues, and has participated in the formulation of several regulations and guidelines for the industry. Mr. McClung brings his extensive knowledge of hazardous materials to each project, and strong project management skills. Working with clients, tenants, and various construction trades, he is able to maintain strict budgets and project schedules. With his experience and knowledge of microbial contamination, he is frequently called upon to assist insurance adjusters with projects involving mold contamination. Environmental projects have included office buildings, manufacturing and industrial facilities, hospitals, medical offices, museums, malls, single and multi-family dwellings, and high-rise condominiums.

David Silveri

Senior Project Manager

BA, Economics

With over 24 years of experience in the environmental contracting and consulting industry, Mr. Silveri has performed and managed hazardous materials projects for commercial properties, educational, and health care facilities, retail, industrial, and military. Mr. Silveri has extensive experience in managing large remediation projects, designing remediation projects and client relations. His projects have ranged from a few hundred square feet to over 100,000 square feet. He has an extensive knowledge of the construction and demolition industry pertaining to environmental issues and is knowledgeable in the various regulations that affect the environmental industry, their interpretations by regulatory agencies, and their implementation with regard to the company's environmental services. He is qualified to provide cost estimates for remediation contracting services: phase I site assessments, lead-based paint, asbestos, indoor air quality

assessments, mold inspections: project design: project supervision:
and project monitoring services. Mr. Silveri is an experienced leader of
technical seminars with regulatory compliance, asbestos / lead
awareness training, and biological hazard awareness training.

Cristopher J. Meile

Field Technician

An experienced technical field manager with over 5 years of experience. Mr. Meile is a knowledgeable resource regarding microbial contamination issues. He is experienced in conducting microbial investigations, asbestos surveys, and lead-based paint inspections in various types of structures. He has assisted and directed clients and contractors in resolving complex environmental issues in a sound business manner. Mr. Meile holds the following certifications: California Certified Site Surveillance Technician, CA Lead-Related Construction Certificates; Inspector/Assessor, Project Manager.

Kristen Williamson

Registered Geologist

BS, Geology

A geologist with over seventeen years of experience, Ms. Williamson has experience performing preliminary site assessments, environmental audits, testing, and remediation services for a multitude of projects. She has assisted clients in making sound business decisions through performing peer reviews of environmental reports.

Brian Stratouly, P.E., CSP

Certified Industrial Hygienist

BS, Mechanical Engineering

MS, Mechanical Engineering

A Certified Industrial Hygienist with over twenty years experience in workplace safety assurance, Health & Safety work plans, confined space entry permitting, noise studies, indoor air quality investigations, and hazardous materials training. Mr. Stratouly is a knowledgeable resource, who approaches his projects in a professional and practical manner. He has the ability to fully understand client needs and can explain technical issues in layman's terms.
